## Experience

---

### Centenary Bank Head Offices

*Kampala, Uganda*

Software Engineer, Intern

*Jun 2023 – Aug 2023*

- Created an application to automate hiring processes, such as auto-rejecting candidates who did not meet the specified requirements.
- Designed and developed features to filter applicants by department and auto-generate emails for various hiring stages.

Technologies: **Django, Bootstrap, PostgreSQL, JavaScript, HTML5, CSS3**

## Education

---

### University of Kisubi

*Jan 2021 – Present(Pending Graduation)*

### Bachelor of Science in Information Technology.

- **Courses:** OOP, Algorithms, Computer Architecture, Data Structures, Databases e.t.c

## Skills

---

**Languages:** PHP, Python, JavaScript, SQL, HTML/CSS

**Technologies:** MySQL, Django, Bootstrap, Git and Github, SQLite, Linux.

## Projects

---

### AI Powered Data Collection and Analysis Platform

Built a system that enables research collaboration, topic creation, AI-generated survey creation with speech-to-text, automatic data analysis and graph generation

Technologies: **Bootstrap, JavaScript, Openai API, SQLite3, Django**

### School Mocks Management System.

Built a system that automates exam management for schools, facilitates registration, payment processing, student tracking, invoice generation, grading, mark release, and PDF report generation.

Technologies: **PHP, Bootstrap, MySQL, JavaScript**
